SLIMTECH

Slimtech is the solution that offers sheets of stoneware in record sizes (300cm x 100cm) and due to extraordinary lightness resulting from a thickness of only 3.5mm. It is the result of a laminating and porcelain compacting technology that has revolutionized the traditional productive process and as a result a completely new, resistive, easy to use, light, flexible, pliable and versatile product is obtained. LEA SLIMTECH fully satisfies the most up-to-date needs for modern planning for both internal and for expansive external areas of modern buildings.

Field sizes available: 118"x40",
